This unidentified flying object(UFO)was video captured with my DJI Phantom 3 Professional 4K/30fps aerial camera. I filed a UFO report with MUFON and they notified NASA and sent them a copy of the video. The video is under investigation and analysis work is being performed on it bu both agencies. I don't know what the object is. I, and others would like to find out what this object is. If you know, please tell us, but....be sure to provide your reasoning behind your answer and possibly some sort of evidence to back up your theory. If you can't provide your reasoning/evidence, don't be offended if I don't take your answer as creditable! For any licensing requests please contact licensing@break.com
