**homeruniverse** 4 months ago

Can you please tell us when exactly was this?

**ACentaur100** 4 months ago

I'm not exactly sure of the date I shot it. I uploaded it on 10-12-16. It might have been a week earlier but I can't swear to it.

**homeruniverse** 4 months ago

OK, thanks for the reply. Does the original file on your drive has a creation date? If the exact date is not certain, than I leave that open when referring to your vid. I am creating a webpage where I collectively comment on these occurrences of white, fast moving objects. There are 50+ cases so far. Yours is the only one where the object shows this tail like effect in the last frames. I am interested in the date because some people brush this phenomenon off as weather related (hail or something). I do not believe that and the data so far indicates that this phenomenon has no relation to any specific weather circumstances whatsoever.

Another question: what drone do you use?

**ACentaur100** 4 months ago

So, the creation date was exactly 10-12-2016 at 6:28 pm. It was a Phantom 3 Pro that I have since sold.

**homeruniverse** 4 months ago

Thanks a lot :D - does this mean you actually captured it the same day you uploaded it or does this only mean you transferred it then from the drone's drive/chip to your computer? Or you don't know? From all what I know if one transfers a file from one drive to another, the creation date remains the same (at least when using Linux or Mac).

[watching the video](#)

I think that's the date/time that the video was taken. I actually didn't see the object while I was flying. It was only after I got home and watched the video that I saw it.

**homeruniverse** 4 months ago

OK, Patrick, you do know. I checked the weather that time in the Jordan Lake (NC) area. Some clouds that day but clear sky from 5:30pm to 9:30pm; that fits to the bright sun rays we see on the top of the trees (weather data for that day <https://bit.ly/2k07lQz>). Furthermore, around 6:30 that day in that location shadows of should have approx. 30 times the length of the object itself. This makes also sense, because we only see the sunlight on top of the trees and not in the grass valleys between the forests.

The issue of these things really only came up with the proliferation of drones in the last couple of years. And the footage is getting better and better with drones becoming cheaper and camera quality increasing. Some people reported and filmed them from the ground, but drone footage is much better for a clearer look (contrasts) and estimation of speed (landmarks and other moving objects in the view).

Regarding your capture I came to the following conclusions:

First appearance at 35\u00b047'24.2N 79\u00b000'05'33.1W (frame 42)

Last appearance at 35\u00b048'18.1N 79\u00b000'05'14.7W (frame 124)

speed: 2261.83 km/h @ 30fps

This is a very average number for these things. (slowest captured are around 450km/h, fast around 24000km/h)

**homeruniverse** 5 months ago

When exactly was this? I want to check the weather data.

**homeruniverse** 6 months ago

Thanks, this is a nice catch. Here is a playlist of footage showing more or less similar occurrences of these white flying things: <http://bit.ly/2G2PODP> -- except for the tail in your video, there are some similarities. Where exactly and when exactly did you film this? Some believe that these things are hailstones (I don't). I want to add the precise weather data for further analysis.

**Zac 11/9** 1 year ago

hi

**Andrew Aguirre** 1 year ago

I watched this footage a few times over and have come to the conclusion that the silly string is generated out of the mountain/terrain instead of moving into the shot from off of the horizon. nice video; when have been here before. I'm pretty sure this is a fabrication.

**ACentaur100** 1 year ago

Then you'd be wrong. I took the video myself and I can't explain what it is but one thing that it is not is fabricated. I fly a drone for fun and have no interest in UFOs. I never said that it was ET. All I can say with certainty is that it is unidentified and appears to be flying. The definition of a UFO.

**Edward Henderson** 1 year ago

What area is this?

**ACentaur100** 1 year ago

A little south of Chapel Hill, NC. An community called Fearington.

**Bigfly Multirotors** 1 year ago

Looks like a video rod. Look it up on youtube, crazy stuff...

**Storms and Saugeye** 1 year ago

Fascinating video. You should also submit this for consideration to the MUFON network so that they can follow up. They tend to be one of the more well respected research sites around.

**pilicon** 1 year ago

FLY FLAT

**FindingUFO** 1 year ago

Hello. Interesting catch! I run a UFO research channel and would love to use your footage on my next upload with further analysis and filtering. All credits to you of course in the descriptions. Would love to hear back!

**ACentaur100** 1 year ago

You are welcome to link or embed my video on your page but I would prefer it not be added to other videos. Thanks for the compliment, though.

**FindingUFO** 1 year ago

@ACentaur100 I can backlink your video as source in the descriptions when using your video. Let me know if this is okay.

**ACentaur100** 1 year ago

Embed the link on your page or share but don't include it in any other video. I don't really know what backlink means but as long as my video isn't included in another video, I'm ok with it.

**thirdphaseofmoon** 1 year ago

Great Catch! Sure would like to enhance your footage!~ May I share it on Thirdphaseofmoon I would be sure to credit you and your channels original link! Let me know....

**ACentaur100** 1 year ago

You may share all you like. I already have someone that is going to forensically examine the video to determine the speed of the object. I'm curious to find out what they can figure out.

**Liberty 4 All** 1 year ago

That's an orb, great catch. I have several on camera. There are more, Orbs. In the past two months, including last year, I have had orbs (3 feet diameter) approach me from 100 feet or less. None of them hurt me in any way. These orbs are all over. I see them every day, mainly at night. I even recorded them. Are they here to intervene? Are these sent to chat with others? Fallen Angels. Trust me, as one approached me, it stopped and turned away and flew into outer space

[Click here to chat with others watching the video](#)

second. I believe it turned away because it sensed my fear. I was afraid because I never had an orb fly directly towards me before. But the power to fly away into outer space in one second is amazing. I had two that was 25 to 50 feet away but it didn't fly towards me. I am just wondering. You have to realize, we are orbs too in a body called flesh. I am just wondering if you have experienced such events; I mean, the orbs approaching you.

 Back to YouTube

I don't know if it was an orb or what it was but I never saw it till I looked at the video at home. I'm not a real believer that anything from outside our world is visiting however I do acknowledge that there are lots of things in this world that defy explanation.

**Liberty 4 All** 1 year ago

@ACentaur100 I am telling you from experience. I just recorded another two days ago. I had them come close to me. It's an orb. Keep looking up, you'll notice more and more.
