Good catch! It is helpful that we see the object approaching from such a distance. When exactly did you record this?

Regarding your case I estimate a speed of 3715.87 km/h using (@ 24fps)

first appearance: 39\u00b015'33.3N 77\u00b0049'05.6W (frame 3814)

last appearance: 39\u00b014'45.2N 77\u00b0047'39.2W (frame 3872)

sallutz Watch it in slow motion, starting at 2:40 in 1440 resolution. Here's a series of screen shots showing it. <http://i.imgur.com/8NArCUD.jpg>

maybe you should draw a circle around it... I don't see anything.

I'm not sure how to do that on the video itself, but here's a series of screen shots from the video that show it. Very small, and it's actually the 2:40 mark that it is first visible. <http://i.imgur.com/8NArCUD.jpg>
