Thijs RC er zijn meer van deze gevallen schijnbaar, onbegrijpelijke snelheid heeft dat ding en het is zeker geen zon in de lens of vliegje, (het perspectief klopt ook gewoon) als je dit op een groter scherm kijkt zie je dat het bij de horizon al begint, ik kan het niet begrijpen, nog steeds niet ; P

ricardopr54 yes I watched the video, looks like the same thing, I still don't know what it could be, especially because it can't be a sun flare playing on the lens.
